

# WTL Emergency Response and Readiness Service

## From analysis to recovery

**Emergency Response and Readiness Services [ERRS] Assist in managing incident response from analysis, containment, eradication to recovery.**

### Business Drivers

When you have been breached and need qualified cyber security staff to provide emergency response services. This can be provided remotely or on-site to reduce the impact of an incident on your organisation.

### Pro-Active Approach to a Breach

Turn your incident response plan into a proactive programme that improves incident response times, lowers costs, and implements a continuous improvement process to strengthen your overall security effectiveness.

Assess your existing ability to respond to security incidents and provide recommendations to shrink the time between incident detection and resolution, ultimately reducing the probability and severity of future incidents.

### Respond

- ☆ Access to highly-skilled security experts 24x7
- ☆ A more rapid response to incidents with reduced risk and costs
- ☆ Mitigate against operational disruption, loss of data, damage to brand and reputation
- ☆ Incident and forensic analysis details with remediation recommendations

### Readiness

- ☆ Perform incident response workshop and training
- ☆ Establish pre-emptive incident response plan
- ☆ Incident response plan gap assessment results
- ☆ Network assessment

### Communications

- ☆ Communication is key to suppliers/customers and senior management. Our experts will help formulate a response to all parties
- ☆ Media Communication, Public Relations in light of the breach going public, our experts have experience and knowledge when dealing with the media
