

WTL Emergency Response and Readiness Service

From analysis to recovery

Emergency Response and Readiness Services [ERRS] Assist in managing incident response from analysis, containment, eradication to recovery.

Business Drivers

When you have been breached and need qualified cyber security staff to provide emergency response services. This can be provided remotely or on-site to reduce the impact of an incident on your organisation.

Proactive Approach to a Breach

Turn your incident response plan into a proactive programme that improves incident response times, lower costs and implements a continuous improvement process to strengthen your overall security effectiveness.

Assess your existing ability to respond to security incidents and provide recommendations to shrink the time between incident detection and resolution, ultimately reducing the probability and severity of future incidents.

Respond

- ★ Access to highly-skilled security experts 24x7
- ★ A more rapid response to incidents with reduced risk and costs
- ★ Mitigate against operational disruption, loss of data, damage to brand and reputation
- ★ Incident and forensic analysis details with remediation recommendations

Readiness

- ★ Perform incident response workshop and training
- ★ Establish pre-emptive incident response plan
- ★ Incident response plan gap assessment results
- ★ Network assessment

Communications

- ★ Communication is key to suppliers/customers and senior management. Our experts will help formulate a response to all parties
- ★ Media Communication/Public Relations in light of the breach going public, our experts have experience and knowledge when dealing with the media

Next Steps

Do not wait for a security breach. Contact our experts today and take a pro-active approach to defending your organisation.

Why Us?

We thrive on collaboration as we believe we all need mutual help and inspiration in our continual striving for cyber resilience.

Our people are highly experienced and certified consultants with international experience and proven track records.

Innovation and value are key to all our services. We are always seeking to deliver what enables more and more organisations around the world achieve a higher level of security maturity and capability.

Established over 30 years ago, WTL has been offering clients a broad range of solutions and services delivered on-premises and via managed services to meet their business transformation, performance and efficiency goals.

Partnering with the award-winning Cyber innovator and successful cyber security specialist, CyberQ Group, WTL offer a set of complementary security solutions including; continuous breach detection to provide real time threat intelligence and monitoring, penetration testing to help customers identify weak spots or vulnerabilities, and security operation centre as a service (SOCaaS), a managed security service which identifies and neutralises cyber threat.
