

# WTL Penetration Testing

## Protect. Comply. Defend.

**Most organisations are the target of random, indiscriminate attacks. Companies typically seek to prevent security breaches with layers of defensive mechanisms, including user controls, cryptography, intrusion/detection systems and firewalls.**

However, continued adoption of new technologies has made it even harder to discover and remove all of your organisations' vulnerabilities and defend against cyber-attacks. Without appropriate penetration testing, they have no way of ensuring that these defences provide adequate protection against cyber-attack.

A penetration test identifies the vulnerabilities that leave your infrastructure and applications exposed and gives you the information you need to close any gaps in your security.

### The Facts

The cyber security community and major media largely concur on the prediction that cyber crime damages will cost the world US\$6 trillion annually by 2021.\*

\*2016 Cybercrime Report, Cybersecurity Ventures

In manual penetration tests, 74% of applications had at least one vulnerability violating the OWASP Top 10.\*

\*2016 NTT Group Global Threat Intelligence Report

### Business Drivers

We use a tailored approach to ensure the engagement for security testing meets the maturity and expectations of your business. Our fixed-cost packages are ideal for small and medium-sized organisations, or those with no prior experience of security testing.

For those with more complex objectives requiring a more detailed exploration of complicated or sensitive environments, our technical services team can provide additional expertise through calls or on-site meetings.

### How it works

Penetration Testing can be purchased in a 'one-off' engagement or subscribed to quarterly.

Our experts will provide an easy to understand report and actionable recommendations to maximise the security maturity of your organisation and defend it against cyber-attacks.

### Next Steps

Do not wait for a security breach. Contact our experts today and take a pro-active approach to defending your organisation.

## Deliverables

Dealing with the results of a penetration test can be overwhelming. Our easy-to-follow reports explain the issues in both plain and technical language.

### Executive Summary

- Provides a high-level view of risk and business impact
- Can be supplied to end clients as a standalone report
- Details the testing methodology

### Technical Report

- Delivers a breakdown of the results in an easy to interpret format
- Gives specific remediation advice that will leave you in no doubt about how to fix the identified issues
- Can include raw test data to help with remediation

### Why Us?

We thrive on collaboration as we believe we all need mutual help and inspiration in our continual striving for cyber resilience.

Our people are highly experienced and certified consultants with international experience and proven track records.

Innovation and value are key to all our services. We are always seeking to deliver what enables more and more organisations around the world achieve a higher level of security maturity and capability.

Established over 30 years ago, WTL has been offering clients a broad range of solutions and services delivered on-premises and via managed services to meet their business transformation, performance and efficiency goals.

Partnering with the award-winning Cyber innovator and successful cyber security specialist, CyberQ Group, WTL offer a set of complementary security solutions including; continuous breach detection to provide real time threat intelligence and monitoring, penetration testing to help customers identify weak spots or vulnerabilities, and security operation centre as a service (SOCaaS), a managed security service which identifies and neutralises cyber threat.
