

WTL Virtual Chief Information Security Officer (vCISO)

Experts protecting your business

Our outsourced Chief Information Security Officer (CISO) service provides a wide range of skills and experience at your disposal, all delivered through a single point of aggregation and accountability.

The service will assist in developing and maintaining an information security management system that supports a holistic, risk-driven framework approach to information assurance. We provide ad-hoc, executive information security leadership and decision making support customised to an organisation's specific mission. Our service is designed to seamlessly integrate our personnel into client organisations, making a positive impact in a short period of time.

Business Drivers

Cyber Security is the biggest challenge of the 21st century and organisations are struggling to deal with the ever-changing cyber landscape to protect and defend against sophisticated threat actors. The lack of security talent and the cost to retain and train qualified staff is difficult for all organisations.

Providing a highly qualified CISO working with your company on a daily basis and/or monthly plan, means your organisation is making informed decisions and managing risk.

Business Benefits

The service will assist you in developing and maintaining an information security management system that supports a holistic, risk-driven framework approach to information assurance. We provide ad-hoc, executive information security leadership and decision making support customised to an organisation's specific mission and security objectives.

How it works

Subscribe to a monthly or yearly plan and utilise a qualified and experienced virtual CISO to work for your organisation, ensuring your client data is protected and your company is adhering to compliance and making informed decisions in managing risks.

Why Us?

We thrive on collaboration as we believe we all need mutual help and inspiration in our continual striving for cyber resilience.

Our people are highly experienced and certified consultants with international experience and proven track records.

Innovation and value are key to all our services. We are always seeking to deliver what enables more and more organisations around the world achieve a higher level of security maturity and capability.

Next Steps

Do not wait for a security breach. Contact our experts today and take a pro-active approach to defending your organisation.
