Defend your data and protect
your business

BaaS
Cloud Backup

Protect your data with safe secure cloud backup

The most effective way to maintain business continuity is to know that your business data is protected in the cloud. WTL Cloud Backup as a Service (BaaS) provides the data protection your organisation requires — and peace of mind knowing your most critical data will be available when you need it.

Simplify your offsite backup

WTL Cloud Backup for Veeam Cloud Connect gives you a secure, offsite backup and the added reassurance of flexible, all-inclusive cloud storage for your growing business. Integrated with Veeam's industry-leading Backup & Replication software, WTL BaaS gives you cloud backup with less complexity, cost, and administration requirements.

Backing up data to traditional equipment can be difficult. Tape backup is challenging and labor intensive. Adding storage nodes to disk backup servers can likewise prove problematic, whether you're worrying about the possibility of disk failure, or the costs of continually adding storage. WTL Cloud Backup resolves these challenges with high performance, flexibility, and scalability.

Focus on business objectives

Designing, building, managing and maintaining a secondary data centre is costly and time consuming. WTL BaaS eliminates the burden of having to manage multiple data centers, while preserving invaluable resources. In turn, your team is free to focus on your core mission, initiatives, and strategies driving your business.

WTL Cloud Backup allows you to protect your data wherever it lives

Key Benefits:

Improve your time to recovery and lower your risk of data loss.

Reduce your total cost of ownership (TCO).

Secure your data file transfer with advanced 256-bit TLS encryption.

Set up backups easily without a VPN needed.

Predict backup storage costs with our straightforward, monthly pricing.

Back up VMware, Hyper-V, and physical workloads with familiar Veeam tools.

Eliminate tape-based storage

Scale offsite storage quickly and easily.

Increase your defense with WTL Insider Protection

Every 11 seconds another business becomes the victim of a ransomware attack. When you add Insider Protection to WTL Cloud Backup for Veeam Cloud Connect, you're giving your organisation another defence against cybercriminals. Insider Protection automatically moves deleted files to an air-gapped, isolated repository in the WTL Cloud. These files can be restored if your backups are accidentally — or maliciously — deleted.

Additional Features:

- ✓ Dedicated 24x7x365 customer support
- ✓ Straightforward consumption model
- ✓ Global and industry-specific compliance
- ✓ Fully encrypted backups in flight and at rest
- ✓ Largest global Veeam Cloud Service Provider

Put your trust in industry leaders in data protection

Both Veeam and WTL are experts in data protection, with decades of experience in IT. We know that successfully moving to the cloud depends on choosing the right cloud platform, and the right cloud partner.
