DRaaS for Zerto

Recover your Zerto backups in the cloud with the industry leader in disaster recovery

When unexpected problems happen, your team cannot afford downtime and neither can your customers. Whether you're dealing with a power failure or something more invasive like a security breach, you need a disaster recovery (DR) solution that can get your organisation back up and running quickly— to avoid damaging your reputation or your bottom line.

WTL DRaaS for Zerto provides you with the ability to reduce downtime and customise your IT recovery. Easily replicate your mission-critical virtual machines (VMs) to the secure WTL Cloud through our seamless integration with your on-premises, VMware-based environment and Zerto's industry-leading technology.

With customised runbooks, WTL DRaaS for Zerto helps you orchestrate failover and failback. Enjoy optimised recovery time objectives (RTOs) and near-instantaneous recovery point objectives (RPOs), along with network flexibility, straightforward pricing and unified management of your DR environment.

We have years of experience and industry-recognised leadership in disaster recovery as a service (DRaaS), which is why WTL makes deployment, testing, failover and failback easier than ever.

WTL - IT Systems, Solutions & Managed Services

Unit 1 Heron House, Ardath Road, Kings Norton, Birmingham, B38 9PJ

WTL DRaaS for Zerto provides you with an integrated DR solution designed to help you recover faster

Key Benefits:

Centralised management and reporting via the award-winning Cloud Console.

Orchestrated failover and failback.

Integrated Zerto replication.

Simplified DR management with Runbook Recovery Groups.

Available planning, design and management services to address organisational requirements.

Dedicated compliance support to address geographic and industry regulations.

Included 24x7x365 customer support.

Since no business is immune to disaster your DR solution should help you recover quickly

WTL DRaaS for Zerto provides optimised replication and rapid recovery. Zerto's continuous replication technology cuts RPOs to seconds and RTOs are nearly instantaneous. Our integrated Failover Wizard also delivers alerts and reports from the Cloud Console to help you through the failover process. Whenever you need extra guidance, WTL DR experts are available to help.

Comprehensive Security and Compliance

Every WTL Cloud solution includes multi-layered security and compliance, including antivirus, anti-malware, firewall, intrusion detection/prevention and integrity monitoring. We also provide you with comprehensive reporting for compliance purposes, via the Cloud Console.

Enterprise-Class Infrastructure:

- ✓ Familiar, integrated VMware-based infrastructure and services
- ✓ Fully redundant environment, built on leading-edge technology
- ✓ Geographic diversity with data centers in the Americas, Europe, Asia, and the Pacific Rim*
