RECOVER

Keep business "always on" with DRaaS-tically simple disaster recovery

Ve
DRaaS for Veeam

Recover your Veeam backups in the cloud with the industry leader in disaster recovery

When something unexpected happens, your organisation needs to recover quickly and keep things running for your customers. Whether it's mother nature or human nature at play, you need a disaster recovery (DR) solution that can help you avoid downtime and keep your business from suffering financial cost, damage to your reputation, or worse.

WTL DRaaS for Veeam integrates the leading solution for backup, disaster recovery and hyper-availability with the WTL Cloud. This deep integration with your on-premises Veeam solution provides you with quick recovery following unexpected events and with central, unified management of your DR environment — onsite and in the cloud.

With years of experience and industry-recognised leadership in disaster recovery as a service (DRaaS), WTL makes deployment, testing, and failover in the cloud simple and straightforward.

Our network flexibility and VMware-based platform provide you with a seamless experience from your onsite infrastructure to the cloud.

WTL DRaaS for Veeam provides you with a DR solution designed for your unique needs

Key Benefits:

- Centralised management and reporting via the award-winning Cloud Console.

- Integrated Veeam replication and failover plan orchestration for recovery in the cloud.

- Available planning and design services to address organisational requirements.

- Dedicated compliance support to address geographic and industry regulations.

- Included 24x7x365 customer support.

- On-demand, fully managed failover option available for added support.

Enterprise-Class Infrastructure:
