

PRESERVE

Get secure cost-effective and scalable data retention with cloud object storage

Obj
Object Storage

Securely extend your on-premises storage to the cloud

As your business moves toward petabyte-scale data storage, WTL Cloud Object Storage provides a cost-effective solution for long-term, secure storage of backups, cloud tiering to reclaim local capacity of on-prem data with flexible latency requirements and other cloud storage needs. Plus, with immutability, you can protect your archive data from ransomware and other threats.

WTL Cloud Object Storage offers an all-inclusive model, which makes cloud pricing transparent. With comprehensive, built-in security and compliance, as well as our decades of IT experience, means you can have peace of mind knowing your data is protected for future use.

Simplify data management

Cloud Object Storage is fully integrated with our CloudConsole, so you can manage all of your WTL solutions from a single, unified platform. Our infrastructure provides powerful tools, including:

- Full S3 compatibility
- Data immutability to prevent data deletion or modification
- High-performance data storage, with fast object retrieval and recovery
- Scale-out architecture to support your organisation's growth

Simplify management of your data archives

Object storage is ideal for long-term retention whether you're looking to simplify your long-term retention, replace your tape backups and archives, object storage is ideal. It's also a good solution for cloud, tiering, big data storage, and legal and compliance archiving.

Key Benefits:

Rapid Scalability

Flexible, cloud-based storage platform supports all your changing data storage needs.

Flexible Data Management

Data versioning helps you manage which point-in-time files to keep, amend, or delete in your objectstore and retrieve previous versions on demand.

Data Availability

All data objects are available 24x7 with a 100% availability service-level agreement (SLA).

Security

Full support for server-side encryption—so you own the keys to your data—along with Object Lock compatibility so you know your files are secure.

World-class Data Centers

Our global data centers are designed to meet the highest standards for security, compliance and performance.

Enterprise-grade Infrastructure

WTL cloud architecture is built from the ground up with proven technology from VMware, HPE, Cisco and others.

Additional Features:

- ✓ Dedicated 24x7x365 customer support
- ✓ Straightforward consumption model
- ✓ Global and industry-specific compliance

Global Footprint

WTL has data center partnerships around the world that are designed to meet the highest standards for security, compliance and performance. We offer a 100 percent availability service-level agreement (SLA) in each of our cloud regions in North America, EMEA, and APAC.
